On the Road to the Cloud – but which Road?

Many large enterprise companies have concerns about moving to the cloud. You are not alone.

The Cloud can reduce cost and complexity, but you need a partner that has entrenched experience evaluating those issues on a large scale,

prosource.it – is your resource.

At prosource.it we work to understand your environment and develop a roadmap to guide the migration journey. Leveraging targeted solutions from Microsoft can often reduce cost and complexity while accelerating the use of cloud technology that brings maximum benefit to your business.

SOLUTIONS		
WHAT IT DOES FOR YOUR COMPANY	THE PRODUCT	HOW IT WORKS
Simplify your email environment	Hosted Exchange Email	A customized deployment and migration plan that includes the option of a fully supported end-state.
Reduce Risk, Manage Remote Workforce	Enterprise Mobility Suite	Accelerate your move to the cloud by employing robust identity and device management that includes advanced data protection and security analytics.
Reduce Traditional Backup Storage Costs	Azure Backup	Increase convenience through long term cloud-based retention of information with advanced features such as flexible deployment
Enhance your Company's Disaster Recovery Program	Azure Site Recovery	Providing fast, cost-effective recovery from a server or site failure across Windows and Linux servers and VM's.
Eliminate Costly, Embedded or Outdated PBX installations	Cloud-Based PBX	Make calls from any device, anywhere across the internet, with global deployment options and consolidated administrative management.
Cost-Effective Calling Plans	PSTN Calling	From Office 365 with existing or new phone lines.
Develop a Realistic and Executable Plan	Cloud Migration Roadmap	Recognizing certain limitations for moving systems to the cloud where possible and maximizing your IT operating investments.
